**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

### ***Specification***

1. The entire specification, including all areas that contain reference numerals, must be checked by the applicant and amended to correct minor errors that relate to improper or inconsistent labeling of terms. *For example*, on page 2, Para. [0004] contains "tube (5)", which then appears in Para. [0006] as "column (5)" OR, *for example*, in Para. [0009], the term "legs of the suspension (2a) and (2b)" is used. The suspension is NOT "(2a) and (2b)", but rather the legs. Revision and correction of the entire specification is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Claims 1-10** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign French document and are replete with grammatical and idiomatic errors, such as several terms having inconsistent meaning, lacking sufficient antecedent basis, or being ambiguous.

As an example, in claim 1 (just to list a few) such ambiguous phrases or terms lacking sufficient antecedent basis are: "respectively or inversely", "placed by manufacturers in order to allow rotation", "the two elements", "immobilized in rotation relative to the tube (5)", "being able to tilt by sliding of the part", etc.

ALL of Claims 1-10 contain such claim language that is essentially incomprehensible within reason due to being so ambiguous and unnecessarily confusing. The examiner has therefore examined claims 1-10 with regard to prior art as best as can be understood.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

*As best understood, Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwai et al., U.S. Patent No. 6,336,647. Iwai et al. disclose a device for fixing a front end assembly of a motorcycle (1) suspension (10), including: top and bottom bridges (11) and (12), a steering stem [shaft] (4), an outer tube [head pipe] (3), handlebars (5) connected to the stem (4), a front fork (13), supporting wheel arm (14), a push rod (15), and shock absorber (18) that allows for various angles of movement of the front suspension, such as caster angles.*
